

Kaggle Project Result Presentation

Chenning Zhang

The best model we selected is Random Forest Model

- **How did you find your features?**

By Forward Selection to find critical features, and add all numerical and logical features.

- **What models did you try?**

Linear Regression (Model 1 & 2)

Decision Tree (Model 3)

Boosting (Model 4)

Random Forest (Model 5)

- **What was the RMSE of your final model?**

The final model we selected is Random Forest, and the RMSE we have on Kaggle is 63.45
